

Security snapshot: 2015's threats

The cyber security landscape is one of constant change with **new threats emerging every minute**. This infographic takes a closer look at the **challenges and most effective solutions in 2015**.

How secure are your endpoints?

Top 3 cyber threats

considered the biggest challenge to businesses in 2015.

85% UK companies say **cyber risk** poses a very real threat.

60% of CEOs are worried that these **threats** will impact growth.

\$12.7million Average cost of a **US data breach**.

85% of exploits detected in 2014 were **3rd party plugins**.

243 Average number of days before a **breach** is detected.

50% Number of European firms **'unprepared'** to deal with cyber threats.

Approach to security

Companies on best practice recommendations from SANS/Council on CyberSecurity...

Follow some/all of the recommendations **79%**

Are aware of it but are not following the recommendations at the moment **16%**

Don't follow these recommendations at all **5%**

Cyber threats in numbers

117,300 Average number of incoming attacks on companies every day in 2014.

25% say that **insider threat** is the main driver for cyber security expenditure over the next 12 months.

Biggest source of data leaks in 2014:

- #1 Hacking
- #2 Inside attack
- #3 Accidentally published
- #4 Lost/stolen computer
- #5 Poor security

Taking a stand with Sandboxing

Top 3 strategies for improving overall endpoint security

92% of companies consider **sandboxing** to be an effective method to mitigate attacks...

...yet **34%** do not see **sandboxing** as a **priority** strategy right now...

...but **47%** do see it as a **priority** over the next 12 months.

Most effective method against internet-borne malware.

defendpoint

privilege management

Regain control over admin rights. Our flexible privilege management module assigns privileges to apps, not users, to protect the operating system.

application control

Protect your software environment. Use our app block module to easily block unauthorized applications, defending against targeted attacks.

sandboxing

Safeguard your corporate data. Our sandboxing module isolates web activity and places it into a secure container, capturing web borne threats.
